## EXPERIENCE

**Bettergy** · Energy-efficiency SaaS company — May 2025 – Present

**Tech Lead**

- Own architecture and hands-on delivery across **4 products and an AI platform (~30 Kubernetes services)**, providing technical direction to an 8-engineer team.
- Architected and launched **MIOT in 4 months**, implementing tenant isolation with **PostgreSQL Row-Level Security** across HTTP and Celery workloads and a TimescaleDB telemetry pipeline; backed by 4,000+ tests.
- Built a multi-tenant RAG platform serving **18,000+ conversations**; improved answer accuracy from **52% to 89%** through hybrid retrieval, reranking, and domain-expert evaluation.
- Engineered idempotent, fault-tolerant document ingestion with Celery, deduplication, and failure recovery; achieved **99.7% success across 11,500+ runs**.
- Re-architected CI quality gates for testing, typing, architecture, and API compatibility; increased throughput **2.4× year-over-year** and enabled multiple daily releases.
- Cut infrastructure and LLM costs by **43%** through Kubernetes rightsizing and model tiering.

**Startup Wise Guys** · Early-stage VC accelerator — Sep 2024 – May 2025

**Senior Software Engineer**

- Built AI-assisted investment screening, cutting review time **40% across 1,000+ companies**.
- Performed technical due diligence on **300+ startups**, assessing architecture, security, and scalability to support **€15M+** in investment decisions.

**Blueberry Málaga** · B2B technical education startup — Oct 2023 – Sep 2024

**Founding Engineer**

- Built the core learning platform and event APIs, supporting **2,000+ professionals across 20+ events**.

**Universidad de Málaga** · University research — May 2022 – Oct 2023

**Software Engineer (R&D)**

- Built Python data pipelines processing **300 GB/month** of geospatial data; reduced scientific processing from **4+ hours to under 1 minute** using vectorization, parallelism, and columnar storage.

## TECHNICAL SKILLS

**Languages:** Python, C++, TypeScript, JavaScript, SQL, Bash

**Backend & Data:** Django, FastAPI, Celery, PostgreSQL, TimescaleDB, Redis, RabbitMQ, pgvector

**Infrastructure & Reliability:** Kubernetes, Docker, Helm, CI/CD, Prometheus, Grafana, pytest

**AI & Web:** RAG, hybrid retrieval, reranking, LangGraph, LLM evaluation, React, Next.js

## EDUCATION

**B.Sc. in Telecommunications Engineering (Electronic Systems)** | Universidad de Málaga | Sep 2023

Undergraduate thesis: **9.8/10 · Honors**
